

Connecticut Science Center

Overnight Excursions 2011-2012

Ever wonder what it would be like to experience science after dark? Well, grab your sleeping bags and flash lights and get ready to find out! The Connecticut Science Center invites you to participate in our Overnight Excursions. Now you can experience hands-on interactive science activities at night! Scouts will engage in our Vertical Ball Challenge (think Rube Goldberg Machine). They will use imagination, creativity, gravity and potential and kinetic energy to create a series of simple machines that start with a marble and end by lifting a 500 gram weight!

All Overnights include:

- Science challenges and activities in our Labs
- Interaction with our Long Island Sound touch tank and reptile collection
- A 3D film in our state of the art Digital Theater
- Exploration of our exhibit galleries
- Free admission to the Science Center the next day
- Light snack in the evening
- Light breakfast the next morning
